[Download Java](#)
- \*2.0 Includes MySpace Song Plays and Profile Views Increaser, MySpace Video Views Increaser, Singe Profile Use. 3.0 Coming Soon with SoundClick and Unlimited Profile Options.

## Trying out Demo Mode

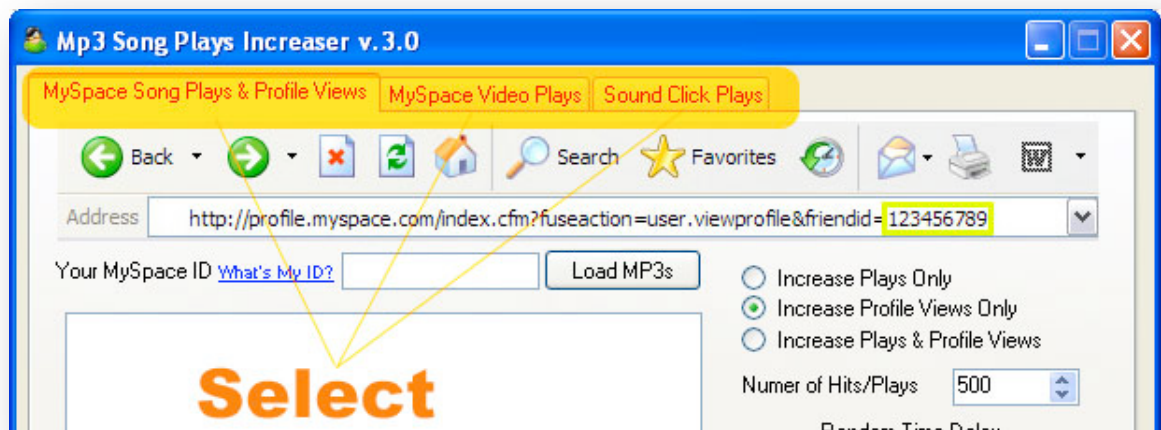

### Demo Mode:

We allow you to try out our program free of charge! You are able to test 1000 song plays, profile views, and video views to prove the capability of our program.

### Getting into Demo Mode:

Then select which section of the program you wish to test out.

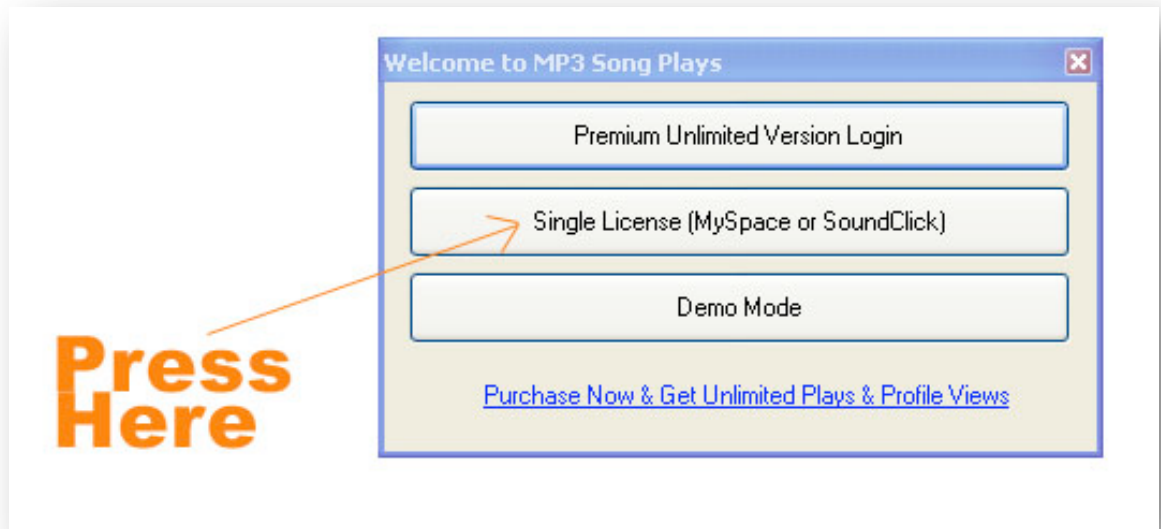

Now proceed to the instructions provided for each based on your selection, see the Table of Contents.

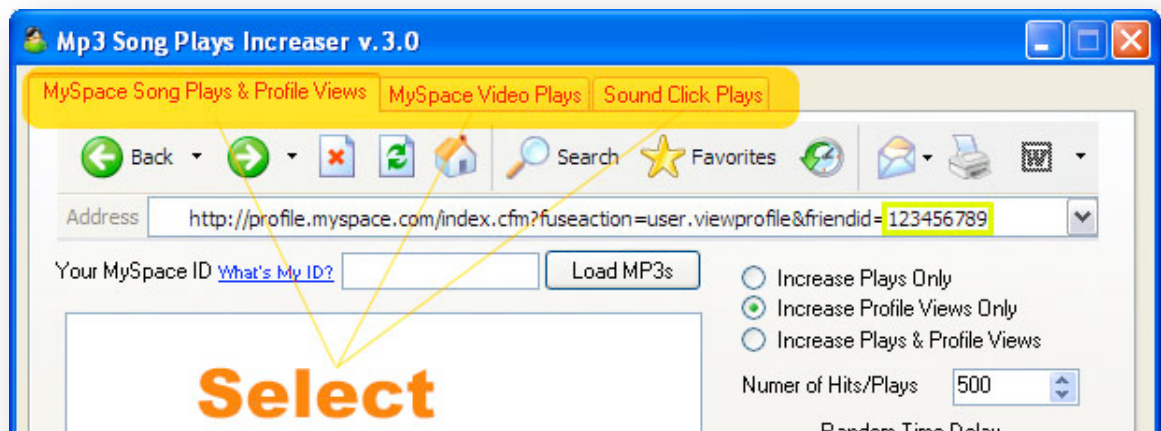

## Logging in as Standard User (single profile)

This is the a la carte version. You have access to each product you purchased separately. The usage is limited to one profile but does allow unlimited usage for that profile and product you purchased

Open the program and select, Single License,

Then Select the Tab of the product you purchased:

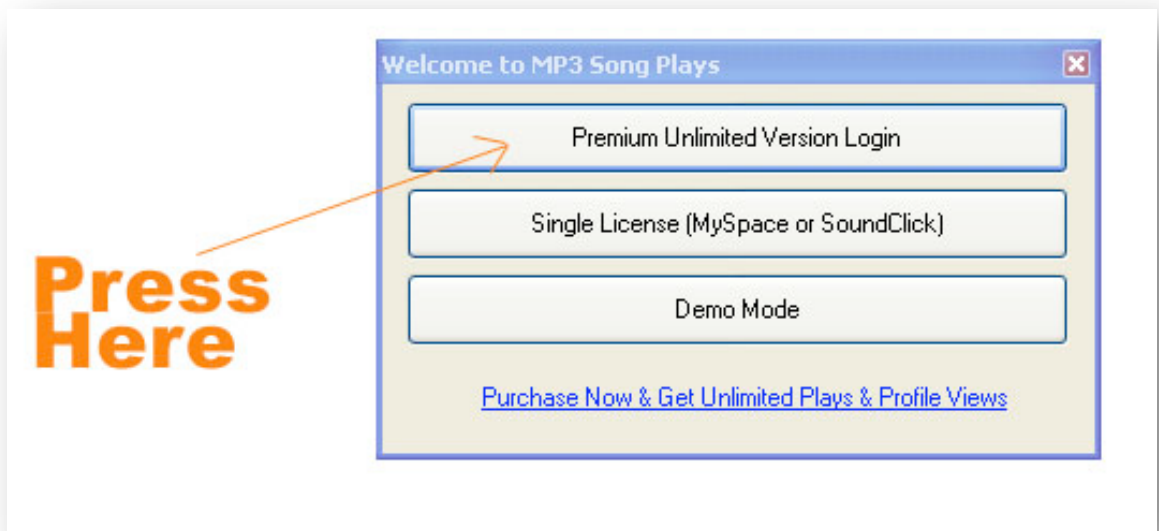

Proceed to Use Section of the product you purchased.

## Logging in as Premium User

Premium users have access to ALL increasers including MySpace Song Plays/Profile Views increaser, MySpace Video Plays Increaser, and the Soundclick.com Song Plays/Profile Views Increaser. The premium package also allows for use with an unlimited number of profiles, whereas standard only allows use on one profile.

Open the program, then select “Premium Unlimited Version Login”

Then enter in your login details for the premium package.

## Using the MySpace Song Plays And Profile Views

### Locate your MySpace id number for your profile.

This IS NOT your MySpace URL address! If you are having trouble figuring out your id number you can use our locator tool here: [MySpace ID Finder Tool](#)

Your MySpace ID [What's My ID?](#)

**Enter ID, Then hit "Load Mp3s"**

(Plays will be distributed evenly between checked songs)

Increase Plays Only  
 Increase Profile Views Only  
 Increase Plays & Profile Views

Number of Hits/Plays

Random Time Delay  
 -  Seconds

Use Random User-Agent Strings  
(Makes hits more unique)

Once you have done this, your songs listed on your profile will populate the window with checkboxes beside them. Select the songs you wish to deliver plays to.

### Choose what you want the program to do:

**Increase Plays Only:** Does not deliver profile views, Only Song Plays

**Increase Profile Views Only:** Self-Explanatory

**Increase Plays & Profile Views:** Will send the number of hits you selected to each song, and profile view count.

**Number of Hits/Plays:** Choose the number of plays and views to deliver.

**Random Time Delay:** Choose the range in seconds to randomly deliver the plays and hits to your profile.

**Random User Agents:** Changes between different type of browsers delivering the hits.

**Choose whether or not you wish to use proxies or not,** for questions on proxies, see the proxy section.

### Hit Start 😊

*\*Note: While profile view count will increase rather quickly, song plays can take 15 to 30min to fully register on your player.*

## Using the MySpace Video Plays Increaser

### Locate your MySpace id number for your profile.

This IS NOT your MySpace URL address! If you are having trouble figuring out your id number you can use our locator tool here: [MySpace ID Finder Tool](#)

The screenshot shows a web browser window with the address bar containing the URL: `http://profile.myspace.com/index.cfm?fuseaction=user.viewprofile&friendid=123456789`. The number `123456` is highlighted in yellow. Below the address bar, there is a section titled "Your MySpace ID" with a link "What's My ID?" and a text input field containing "123456". To the right of this field is a "Load Videos" button. Below this is a large text box with the instruction "Enter ID, Then hit 'Load Videos'". To the right of the text box are several settings: "Number of Plays" set to 500, "Random Time Delay" set to 0 - 1 Seconds, and a checked checkbox for "Use Random User-Agent Strings (Makes hits more unique)". At the bottom of the interface, there is a note: "(Plays will be distributed evenly between checked videos)".

Once you have done this, your videos listed on your profile will populate the window with checkboxes beside them. Select the videos you wish to deliver views to.

### Choose what you want the program to do:

**Number of Plays:** Choose the number of plays and views to deliver.

**Random Time Delay:** Choose the range in seconds to randomly deliver the plays and hits to your profile.

**Random User Agents:** Changes between different type of browsers delivering the hits.

**Choose whether or not you wish to use proxies or not**, for questions on proxies, see the proxy section.

### Hit Start 😊

*\*Note: Video plays can take 15 to 30min to fully register on your player.*

## Using the Soundclick Song Plays And Profile Views

Use your SoundClick.com's user id for your profile.

This IS NOT your soundclick URL address!

MySpace Song Plays & Profile Views MySpace Video Plays **Sound Click Plays**

Member Profile Name

**Enter USER ID,  
Then hit "Load MP3's"**

(Plays will be distributed evenly between checked songs)

Total Plays: 0  
Page Views: 0

Sound Click statistics are updated once every 24 hours

Increase Plays Only  
 Increase Profile Views Only  
 Increase Plays & Profile Views

Number of Hits/Plays

Random Time Delay  
 -  Seconds

Use Random User-Agent Strings  
(Makes hits more unique)

Once you have done this, your songs listed on your profile will populate the window with checkboxes beside them. Select the songs you wish to deliver plays to.

### Choose what you want the program to do:

**Increase Plays Only:** Does not deliver profile views, Only Song Plays

**Choose whether or not you wish to use proxies or not,** for questions on proxies, see the proxy section.

**Hit Start** 😊

*\*Note: Soundclick stats are updated once every 24 hours.*

## Proxy Explained

The proxy list is an optional included feature that makes it so the hits are routed through other servers around the world (so they don't appear to all be coming from the same computer). As long as you keep to a moderate usage, I wouldn't necessarily bother with them.

You can get free proxies from sites like:

- \* <http://www.proxy-list.net>
- \* <http://www.samair.ru/proxy/>
- \* Free Proxy Software: <http://www.proxyfarm.com/>
- \* One way to get unlimited free working proxies is to download Tor from [www.torproject.org](http://www.torproject.org)

If you want to use the proxy feature. One way to get unlimited free working proxies is to download Tor from [torproject.org](http://torproject.org). Proxies relies on relaying the hits through other servers, it will tend to make it run slower.

You can also use the [www.Hide-My-IP.com](http://www.Hide-My-IP.com) Premium with their High Speed Premium Service. With the premium service, they provide high speed proxy surfing from proxies around the world automatically.

Note: Always test the proxies first with a proxy checker to ensure they are "alive". Proxies don't work forever and change daily. If they are not working, they are considered "dead" proxies. This means your hit never gets delivered because the proxy your are using is not active.

You can check for proxy list for free here  
<http://www.checker.freeproxy.ru/checker/>

### Format required if using proxies in the program

The list should be a plain text file with the format of proxy:port (one per line). There should be no spaces between the colon and the port. A typical proxy list should look like this:

```
35.9.27.27:3128  
194.36.10.156:3127  
218.58.136.14:808  
202.41.168.246:80
```

## Frequently Asked Questions

### Immediate Error when submitting with proxies. Proper format for uploading Proxies.

The list should be a plain text file with the format of proxy:port (one per line). There should be no spaces between the colon and the port. A typical proxy list should look like this:

```
35.9.27.27:3128  
194.36.10.156:3127  
218.58.136.14:808
```

### I am not seeing any song plays after an hour, plays not registering.

This will happen if you are using bad proxies ips. Proxy ip addresses must be active and "good proxies", otherwise your plays sent by the program never reach to intended site to deliver the plays. Either use verified active proxies or no proxies and your plays will then be delivered properly. You can check for proxy list for free here

<http://www.checker.freeproxy.ru/checker/>

### Program won't open | Can't Install it | Windows Users

Our windows version requires that you have the most recent update from Microsoft .NET Framework. If you do not have the most recent update once you install the software, you will be prompted to update .NET Framework from the MicroSoft website.

Go to the .NET Framework page and install. After install, run WINDOWS UPDATE from your computer to ensure your .NET is up to date.

### How many times can I add plays or page views and what is the total number of plays or visits I can increase by?

There is no limit on how many plays or visits you can use it for. We do recommend that you try to keep it somewhat reasonable, but you don't need to.

## How Many Computers Can I Run Mp3 Song Plays Increaser on?

We have 2 different types of licenses available.

**Standard Plan** - One Profile Allowed - Use on as many computers as you want, however, you will not be able to add song plays to the activated profile you paid for.

**Premium Package** - Unlimited Profile Usage, Unlimited Access to all music plays increaser for myspace and soundclick. We only allow installation to a maximum of 3 computers.
